hi, Tom. sorry for the delay, but i finally got a chance to read this. it looks good. i just have a few editorial comments (see attached). also, when we send this to NCI, it would be good to attach the Ichimaru et al. and Meyers et al. papers, for their convenience. jj

Barbara/Andrew/Jennifer,

I wrote out a more complete description of the additional analyses I had proposed. Please review and let me know if you have comments or suggestions.

I have attached a few of the related papers in case that facilitates reviewing them.

Thanks,  
Tom
